	Urgent	**Not Urgent**
Important	**Do - (Your MVP)** ● Retrieve next day's weather forecast ● Analyze weather (feels-like, actual, etc) ● Output/display user recommendations	**Schedule - (For V2.0+)** ● Allow users to customize clothing preferences (what to wear in precipitation vs mostly cloudy, etc) ● Save/track previous recommendations and feedback on them for future use ● Recommend outfits based on time of day, rather than day as a whole
Not Important	**Delegate - (Use a library)** ● HTTP request handling ● Command line arguments ● Parsing API response	**Delete - (Cut it)** ● Integrated AI for learning user preferences ● Graphical interface/app ● Social features
